TELVUE

We share your vision™

TelVue InfoVue™

Digital Signage for a Data-Driven World

Super-charge your channel with up-to-date weather, traffic, news, community, and other dynamic information.

Broadcast real-time 24x7 information on your TV channel and website with the **TelVue InfoVue™**, a professional quality, web-accessible digital video message board solution. In addition to crystal-clear station branding and text tickers, the **TelVue InfoVue™** can render local weather, traffic, news and information feeds directly to TV.

Local News Feed

- Drag & Drop Template Design
- Easy Content Upload & Management
- Weather, Traffic, News & Sports Feeds Available
- Supports User Video/Audio, Text, Images & RSS
- Manage Remote Contributors
- Broadcast Quality Video Output up to 1080p
- Cloud-based User Interface & Content Storage
- Advanced Scheduling & Reporting
- Reliable Rack Mount HD Signage Player
- HD-SDI, HDMI & RTMP, and IP Video Output

TelVue InfoVue™ 2 can help you attract and retain more viewers with up-to-the-minute information that is important to them. Give your community's anchor institutions the ability to update their own announcement "space" on your channel. Broadcast announcements full screen, or zone your screen to display information at the same time as video programming. Manage, design and create your signage from anywhere.

TelVue InfoVue™ is based on two components:

- The TelVue InfoVue Content Management System (CMS) - a cloud-based digital signage management application featuring drag-and-drop template design, content, schedule, and user management - securely accessible from your web browser, no matter where you are.
- The TelVue InfoVue Player - InfoVue Standard or Pro professional, broadcast-quality digital signage player appliance, or InfoVue Stick player for individual screens. Players securely pull content, data, and schedules from the InfoVue cloud and render the video output locally for display. The InfoVue Pro supports IP output with RTMP mirroring for web display.
